

Do you already know of our new webshop?

View delivery times at a glance, prices or product availability, or quickly place an order yourself - all 24/7 and 365 days a year:

With the comprehensive possibilities of our new e-commerce platform Smart Portal, this is now possible without any problems and orders will only be a mouse click away in the future.

Everything in view 24/7

Prices, availability, delivery times, spare parts and much more - you can easily place orders online.

Orders made easy

Order quickly and easily at any time and from anywhere: You can see immediately which items are in stock, whether delivery times are changing and what the price of a product is.

Order history and online tracking

Even more transparency: Trace your orders at any time and keep track of them with the order history.

Simple user interface

Smart item search by article number, product name or category possible: with suggestion function, as you are used to from a Google search.

Compatible with your enterprise resource planning system

We would be happy to check the connection/integration of the Smart Portal to/into your ERP or merchandise management system. Punch-in and punch-out solutions can be used to simplify, optimize and automate order processes.

Always up to date

Comprehensive online product catalogue with over 5000 products and all product data, -features and benefits clearly arranged in one place.

Compare products

Compare the performance features and specifications of products at the click of a mouse.

Service

Direct link to the ServAid service programme: spare and wear parts, dimensional drawings, operating instructions, safety recommendations and much more.

Save time and effort

Create your own order templates for recurring orders and minimize errors through manual (order) processes.

Intuitive operability - get started right away

Our e-commerce solution, including online catalogue, is web-based and therefore does not require any special software or technical know-how.

Here you can discover the new webshop including the online product catalogue.*
